About Me

Mechatronic Engineer who found a passion for web development, i also have strong experience with OOP with languages such as Javascript /C#. I currently have over 1 and a half years of experience working in my own personal projects, always emphasizing a clean design and also well structured code and logic. Currently seeking opportunities to push myself to the limit while learning more.

Professional Skills

- Frontend Web Development (HTML, CSS, Astro, React, Bootstrap)
- Experience with OOP (C#, Javascript, Java)
- Experience with SQL databases
- Version control with Github
- Experience in graphic design

(C# .NET) User Control Program - (February 2023)

This is a simulation for users / employees management using OOP on C# .NET with an SQL Server connection designed on a layered architecture.

Personal Projects

(C# .NET) ATM / Bank app Simulation - (March 2022)

C# .NET app that uses almost every concept of OOP to create, edit and delete users. each and every user has its own attributes like name, age, address, and so on. Users also have a balance which can be altered through withdraws or deposits. It also counts with a history view for every transaction made.
