About Me

I am a Mechatronic Engineer who discovered a passion for web development. I have strong foundations in programming languages such as JavaScript, C#, and Java. With over a year and a half of experience working on personal projects, I prioritize clean designs and well-structured code and logic. I am currently seeking opportunities to further develop my skills and knowledge.

Professional Skills

- Frontend Web Development (HTML, CSS, Astro, React, Bootstrap, Tailwind)
- Programming Languages (Javascript, Java, C#)
- Relational Databases (MySQL, SQLServer)
- Version control with Git
- Proficient in graphic design

Personal Projects

(Astro + Tailwind) Personal Portfolio + Projects - (March 2024)
This is my personal website/portfolio created with Astro and Tailwind. Inside, you can explore my other front-end projects.
Link: Click

(C# .NET) User Control - (February 2023)
This is a simulation for user/employee management using object-oriented programming in C# .NET with a SQL Server connection designed in a layered architecture.
